THE LEGISLATURE

by Chick Evans

There was great diversity of interest in events that crowded the 13th week of legislating in Augusta. You could take your choice of a wide range of subjects. For one thing, the 98th decided to increase its workweek by one third, at no advance in wages. For another, it puffed up its interest in what happens to the sales tax, as one bill to raise the rate to three percent with more exemptions was followed by another holding the rate at two per cent, cutting exemptions and proposing to drop \$3-million into the towns. There were two exciting hearings on motor matters—milk and minimum wage. There was the announcement that revenue estimates had climbed. Birthdate driver licenses got a committee greenlight. Riding with naked scythes was still punishable offense, with the House determined to keep it so in spite of the Senate. And Rep. Albert E. Cote flew to New York to challenge the world to an egg-eating contest.

Two Percent "Across Board" Sales Tax. Rep. E. Perley Caswell (R-New Sharon) introduced a tempting sales tax measure which would leave that tax at two percent and have it apply "across the board," exempting only gasoline and motor fuel for highway use, cigarettes, and liquor sold in state stores. Present exemptions including groceries, domestic fuel and some agricultural, industrial and commercial fishing supplies, would be removed.

Proceeds from the tax would be tapped for \$3-million a year which would be pro-rated to the municipalities on a population basis. Revenue from the sales tax, unless there is change in the present rate and exemptions, the change in the latter would bring in about \$8-million a year.

Three-cent Sales Tax. With the stated purpose of producing some \$4-million a year to be used primarily for increased state services in the fields of education, institutions, and welfare, the expected bill to raise the sales and use tax from two to three percent is now in the legislative mill. Following the philosophy expressed in the governor's budget message, the ad-ded tax would bring revision in the bracket system, with the following levies: Sales of 11 to 35 cents, one cent tax; sales from 26 to 40 cents, two cent tax; sales from 41 to 50 cents, a three cent tax. Another three cents would be charged the customer for each dollar and the above amounts amounts to fractional parts of a dollar.

The bill, presented by Rep. Eben L. Ewell (D-Brooks) would increase the list of exemptions by adding water, gas and electricity used in the home. Present cited exemptions include food, fuel, some farm supplies, and raw materials used by industry.

Traffic Circle Right-of-Way. The question as to who has the right of way in the use of traffic circles was discussed in hearing before the Transportation Committee, on a bill offered by Rep. Emery O. Beane (D-Augusta). The State Police and State Highway Commission favored giving priority to the driver already within such a circle. The Beane measure provides that a vehicle approaching but not having entered the circle shall yield the right of way to a vehicle already within it. State Traffic Engineer Ralph Sawyer stated that the regulation has long been needed. He suggested an amendment designating traffic circles as rotary intersections, with the right of way rule operating unless police officers or traffic control devices are directing the road.

The Week in Oxford County

The South Paris Baptist Church society has purchased the Dr. Raymond E. Houghton property, corner of Park and Deering Streets. It will be used as a parsonage. A grass fire of undetermined origin destroyed four buildings in Waterville, Sunday afternoon. Five persons were left homeless. Homes of Mr. and Mrs. C. L. Brooks and Mrs. F. Rehman were burned. Loss was estimated at \$12,000. Help went from Oxford, Mechanic Falls, and Norway.

The cottage home of Mrs. Grace Stone and 13 year old Carol Wing at North Waterford was burned Friday night. A passing motorist discovered the blaze. Damage was estimated at \$12,000.

Miss Marion V. Western and Miss Richard J. Frank, members of the Miners, from Dixie, were guest speakers at the Congregational Church, Oxford, Sunday morning. Barbara Honey, daughter of Mr.

COMMENTS FROM THE TOWN MANAGER'S OFFICE

The last few days have made us very conscious of the danger from fires. I realize we are all anxious to clean up around the yard or fields and certainly the dead grass burns up very clean now. Several homes have been lost in nearby places due to grass fires. We are still having a heavy expense caused by some one lighting the dump at West Bethel. Newton's mill has been threatened and he has been very much concerned at the situation. The dump is now closed. Please check with our Fire Chief for permit to light any more fires, and make reasonable plans to have sufficient help to take care of any situation that may arise from such fires.

Thank you,
O. T. Rozelle

LOCALS

BRYANT POND SITE OF STATE CONSERVATION EDUCATION PROJECT

Maine's first venture in Conservation Education will get underway this summer when two "workshops" will be held at Waterhouse estate at Lake Christopher, Bryant Pond. Although progress is presently hampered by proposed legislation which is "tabled" in the House and Senate at Augusta, the summer's program promises a start which already has attracted much favorable interest.

The project received timely encouragement last fall when the interest of Governor Muskie was aroused by Commissioners Roland Cobb (Inland Fisheries and Game) and Warren Hill (Education). The workshop will be headed by Lawrence Stuart, conservation director of the Inland Fisheries and Game Department. The workshop will be held June 24-27 and July 15-Aug. 2. A third workshop will be held at the University of Maine campus July 29 to Aug. 16.

The Lake Christopher property was given to the Maine Fish and Game Association two years ago by Mrs. Lillian Waterhouse of Portland, to be used for any conservation purpose. The summer teacher training programs are arranged under the Conservation Education Foundation of Maine.

A picked group of teachers from all sections of the State will comprise the first session. They will be to design and provide working materials that can be integrated with other subjects. The purpose of the educational program is to give every individual understanding of his dependence on natural resources and to stimulate a public determination that the best of conservation practices be followed.

THE LEGISLATURE

—continued from page one—
Beane suggested another amendment making it unlawful to operate a car clock-wise in a traffic circle. "I think should be spelled out," he told the committee.

Milk Control. The Maine milk control law is very good or it is very bad. This is the choice a casual observer would have had at a hearing before the Agricultural Committee this week. The law was defended as a stabilizer that has kept one of the state's biggest industries out of trouble for 22 years. Producers and dealers frequently opposed on the method of pricing. Agreed that the law is beneficial to them and to the consumer, and is here to stay. Former State Commissioner of Agriculture Fred J. Nutter told the committee: "I believe the law has worked for the welfare of the state".
